MOHAWK NATION OF GRAND RIVER SECRETARIAT

Certificate of the record

The Passport and the Credentials
POS001-261028-000022 · version 1 · A draft — not yet for use

WHAT IT IS

The passport’s data page at true size, filled for an invented holder; the visa pages under ultraviolet light, the first Sky Woman spread drawn large, proposed; a key to what the page carries; the booklet page by page; the three cards at true size; what the officer sees; and the five ways a border checks a passport. On the web a switch turns the light to ultraviolet and lights the booklet page by page, a second fills the page for the specimen holder, each card turns over on a tap, the check digit is worked out character by character, a share link proves one fact, and the five ways light in order.

Its date	2026-10-27al
Made by	Mohawk’s Printer for Grand River
Their qualifications	Drawn by Mohawk’s Printer for Grand River from the National Books’ own data; Book XII, Passports and Credentials shows it on a page of its own.
Their duty	Not recorded.
Its standing as a survey	This is the Nation’s determination, made from the sources named; it is not a survey under the Surveyors Act, and was not prepared by a licensed surveyor.
Datum and projection	Not a map; the Three Villages’ inset keeps the land map’s datum (NAD83 / UTM zone 17N).
Scale	
Its certificate	

HOW IT WAS MADE

An illustration, drawn from the sources below; printed in A3 landscape (420 × 297 mm), with A2 and A1 print files, 3 mm bleed and crop marks.

HOW SURELY

An illustration, not a survey: the figures stand for no particular family. The Three Villages’ inset is the Register’s own land map, drawn from its layers.

A poster: it teaches, and does not decide. The record of any person’s line is the Register’s.

Whether a record is admitted, and its weight, are for the court.

MOHAWK NATION OF GRAND RIVER

The Passport and the Credentials

What the Nation issues, and what each document carries, seen in one place.

The passport's data page, its page under ultraviolet light, the three cards at true size, and the five ways a border checks them · From Book XVI of the National Books, Passports and Credentials

THE DATA PAGE AT TRUE SIZE, THE VISA PAGES UNDER ULTRAVIOLET LIGHT, AND WHAT THE PAGE CARRIES

Filled for Aiyana Hill, the invented holder of Book XVI. The last digit of each line is a check over the rest.

1 · The Sky World, the first of five Sky Woman spreads in fluorescent ink: proposed, for the keeper of the story to approve.

WHAT THE PAGE CARRIES

1–5
the nine ICAO fields, in ICAO's order: surname, given names, nationality, date of birth, sex, place of birth, date of issue, authority, date of expiry

P · GRT
a passport; the Nation's own code, which no state uses

PASSPORT NO.
the Record Code, PSP001-YYMMDD-NNNNNN: the passport's one number, and the Register's

THE WINDOW
a second image in the page itself: it cannot be pasted over

THE CHIP
the page signed by the Nation, where one is fitted

THE TWO LINES
44 characters each, with check digits, read by any zone reader

THE BOOKLET, PAGE BY PAGE: THE COVER TO THE BACK COVER

THE THREE CARDS, AT TRUE SIZE: ISO/IEC 7810 ID-1, 85.6 × 54 MM

WHAT THE OFFICER SEES, AND THE FIVE WAYS

1. **By eye** — the printed features: looks genuine
2. **A UV lamp** — inks, thread, fibres: glows as it should
3. **A zone reader** — the two lines: read, and add up
4. **A chip reader** — the signed data: signed by the Nation
5. **The Register** — its standing, term: in force today

The first three are the world's; the last two are the Nation's own.

The specimens are specimens: Aiyana Hill is invented and the codes are drawn for the poster. Every page and feature is described in Book XVI, and the standards it follows: ICAO Doc 9303, ISO/IEC 7810, 14443 and 18013, and AAMVA.
